

# Cube Ice Maker

The water-flowing mode automatic ice cube making machine adopts the microcomputer detection and control system, which is fully automatic design. The ice machine uses compressors and an upright high-efficiency ice tray for fast ice production, saving time and effort.

## TECHNICAL INFORMATION

<b>Model</b>	IM-BT-300CI
Ice Making Capacity	300kg/24h
Ice Storage Capacity	125kg
Ice Shape	Square Cube Ice
Input Current	2000w
Ambient Temperature	-18°C
Power Supply	220V / 50Hz
Refrigeration Type	Fan Cooling
Tank Shell	Stainless steel
Refrigerant	R404a
Dimension	770*840*1720mm
Package Size	870*940*1820mm
Net Weight	125kg

---

## Features

- Fully automatically computer controlled, convenient for use.
- Automatic detection and protection in case of operation, water deficiency, ice full and malfunction.
- The compact structure is simple and space-saving.
- Highly efficient fluoride-free compressor, energy saving and environment-friendly.

---

## Application

- Cafes
  - Restaurant
  - Convenience stores
  - other entertainment venues
-
